

Nutriquire™

Nutriquire is a microbial-based product that increases the active biomass in the soil. Nutriquire introduces microbes into the soil resulting in improved plant vigor and nutrient cycling. Many of the bacteria found in Nutriquire are spore forming bacteria allowing for flexible mixing and application options.

MULTI-CROP USE

- CORN
- SOYBEANS
- WHEAT
- ALFALFA
- SUGAR BEETS
- POTATOES
- CANOLA
- COTTON
- & MORE

KEY BENEFITS

- Enhances fertilizer by increasing plant nutrient uptake
- Improves availability of phosphorus and potassium
- Increases root mass growth
- Improves soil environment for plant growth by building the aerobic zone of the soil
- Aids in unlocking nutrient tie up caused by high or low pH soils
- Stimulates soil microorganisms that provide essential nutrients for plants through their productive biological processes

IMPACT ON THE PLANT

- **Easy to Apply**
A wide range of application methods
- **Improved Nutrient Uptake**
Overall plant nutrient efficiency, availability, and uptake
- **Versatility**
Longer shelf life and versatility of application
- **Increase in P & K Availability**
Improve phosphorous and potassium availability
- **Nitrogen Availability**
Converts soil N to plant available forms quicker

2022 DATA RESULTS

APPLICATION (32 OZ / ACRE)

In-Furrow/Foliar

Tank Mixing

- Step 1**
Load water into the application tank
- Step 2**
In-furrow - Load Starter Fertilizer into tank
Foliar - Load adjuvants, compatible herbicides, fungicides & compatible
- Step 3**
Load 32 oz/acre of Nutriquire into mixture

- Packaging**
2x2.5 gal
275 gal
