

CALF SUPPLEMENT

Calf Supplement is designed to help support a normal immune system and assist with recovery. Calf Supplement provides vitamins, minerals, direct fed microbials and energy sources to be fed in combination with milk replacer or whole milk. Calf Supplement can be a key part of your nutrition supplement protocol to support optimal calf development.

NUTRIENT CONTENT

Crude protein, min	27%	Phosphorus, min	0.4%
Crude fat, min	19%	Vitamin A, min	70,000 IU/LB
Crude fiber, max	9.5%	Vitamin D3	20,000 IU/LB
Calcium, min	0.6%	Vitamin E	350 IU/LB
Calcium, max	1%		

INGREDIENTS

Dried Egg Products, Dried Milk Products, Vegetable Fat (preserved with BHT) as coconut, Dried Lactoferrin, Dicalcium Phosphate, Maltodextrin, Calcium Carbonate, Vitamin E Supplement, Iron Proteinate, Ferrous Sulfate, Zinc Proteinate, Manganese Proteinate, Vitamin A Supplement, Manganese Sulfate, Zinc Sulfate, Selenium Yeast, Vitamin D 3 Supplement, Copper Proteinate, d-Calcium Pantothenate, Niacin Supplement, Copper Sulfate, Folic Acid, Riboflavin Supplement, Pyridoxine Hydrochloride, Thiamine Mononitrate, Vitamin B12 Supplement, Biotin, Sodium Selenite, Menadione Sodium Bisulfite Complex (source of Vitamin K Activity), Flavor, Cobalt Proteinate, Ascorbic Acid, Potassium Iodide.

FEEDING INSTRUCTIONS

Calves should be provided 2 to 3 quarts of good-quality colostrum as soon as possible after birth, and another 2 to 3 quarts within the first 24 hours of life. Feed calves a fortified milk diet or mixture of milk replacer and water with at least 13% milk solids twice per day. Calf Supplement is not intended to replace a balanced diet of milk replacer and water or whole milk. Calf Supplement is not intended to replace clinical treatment for calves. Consult your herd veterinarian and calf nutritionist for further recommendations.

MIXING

Thoroughly mix Calf Supplement powder with warm (110°F) fortified milk or milk replacer and water to achieve 13% solids content. Add 35 grams of Calf Supplement into at least 2 quarts of fortified milk or milk replacer and water. Mix or shake thoroughly.

FEEDING

After mixing, immediately feed the reconstituted mixture twice daily. Calf Supplement may be fed for up to 15 days or until desired results are achieved. Do not exceed the recommended feeding rate of 35 grams of Calf Supplement per 100 pounds of body weight.

Caution: For use in livestock only. Do not exceed recommended dose.
